sensitive electronics  
with PowerGuard<sup>®</sup>

Don't wait until  
lightning strikes to  
get PowerGuard.  
Call Union Power today  
at (704) 289-3145 or  
(800) 922-6840 to protect  
your electronics before  
the next storm.

Protect your  
sensitive electronics  
with PowerGuard<sup>®</sup>

*Consumer Reports* considers surge suppressors – like the **PowerGuard** system – a sensible form of additional insurance. That’s because power surges can damage

or destroy today’s sensitive electronic equipment. Your home computer, satellite dish, TV and stereo systems are at significant risk and deserve high-powered protection.

Now, you have a way to protect your valuable electronics with the best surge protection available – the **PowerGuard** system.

**PowerGuard** offers you the ultimate in protection for your home’s electronics. The system includes a special utility-grade, high-energy surge protector installed

behind your electric meter. Plug-in surge protectors are available that are six times more powerful than locally-available protectors in their ability to block and absorb power surges. Affordable financing is provided, too.

The **PowerGuard** system includes installation by a trained Union Services technician,

who will also check the grounding system of your home. We can let you know about any improvements you may need to make.

**Union Services** is a subsidiary of Union Power Cooperative. The subsidiary was formed to provide energy-related services to Cooperative members and the general public. The purpose of Union Services is to offer quality, reliable services at affordable prices.

We employ professional technicians with years of experience. Our electrical division can provide quality service for all your residential, electrical needs. We are licensed, insured, bonded – and we guarantee our work.
